3D Halloween Bat Templates

Printing & Cutting:

Use standard 8.5" × 11" paper and select **Actual Size** or 100% in your printer settings. Do not select *Fit to Page*.

For reusable templates, print on white cardstock or tansfer the shapes onto cardstock after printing on regular paper. *Do not fold your templates.

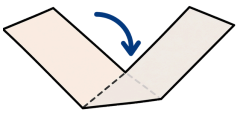

Folding & Displaying Your 3D Bats:

Mountain fold (dashed line): - - - - - -

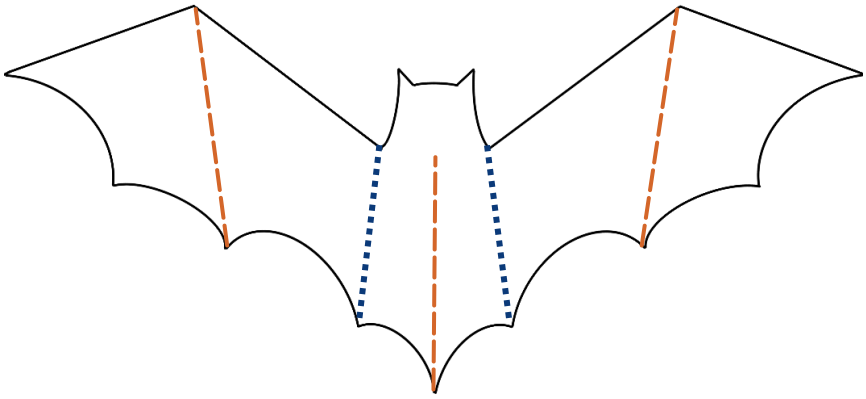

Fold the paper away from you so the fold makes a ridge (like a mountain).

Valley fold (dotted line): .....

Fold the paper toward you so the fold makes a crease that goes inward (like a valley).

*Stop the middle fold at the bat's neck so the head remains flat. This is where you'll attach it to the wall with removable mounting putty.
